

Reds Parts Attic & Chrome Plating Service
2019 Newsletter Volume 2 Issue 14

Customer Service, Communication and Quality of work are important to us.
We stand by every job we do! Read what our customers have to say!

Feature: Here at Red's, we chrome a lot of parts from early generation Corvettes from the 1950s, 60s and 70s. These Corvettes, need their bumpers, grilles, trim, etc. all in need of a new show car finish. We don't usually see a lot from the 4th or 5th generation, as these generations are made of plastic and not a lot of chrome. The only place you might find chrome are on the wheels or some engine parts under the hood. We were contacted by a customer with a 1999 C5 Corvette and he found ways to add chrome inside and out. Here at Red's we haven't seen this much chrome on a 1999 Corvette. There is no doubt Mike likes chrome. Throughout his Corvette, you will find chrome finishes along with black carbon fiber

adding a nice, clean and custom look. He contacted us needing help with a 4 point, safety roll bar. Roll bars are constructed out of a round pipe and can be big and bulky. This makes them a little tricky to do them right but with our experienced crew we had no problem turning this piece of bar metal into a chrome show piece. Mark was very happy with the final results and allowed us to help with another order. Mark said when he can figure out where to put more chrome, he will be giving us a call. Mark has done other upgrades to his Corvette. He has added Lambo doors. Now when he has the doors, deck lid and hood open his Corvette appears it's going to morph into a chromed out Transformer. Mark also added performance upgrades to his LS1 engine. He added full race heads and a cam. He installed long tube headers along with a B&B exhaust. He had tested his Corvette on the dyno and produced around 450 HP. He's even added a nitrous kit which could add another 100 HP. He has yet to test this theory but it's plumbed and ready!

Customer Testimony: Last year I added a roll bar to my 1999 C5 corvette. Joe and his guys did my chrome work. This year I added a nitrous kit. I had some brackets in need of chrome for the engine compartment. I also had a plate for the switches and the boost gauge done. Here are some pictures of the chrome from Red's. Looking good! If you are looking for a good chrome shop RED'S is the place. Mark Rowe (Indiana)

Red's Comment: Thank you for sharing your photos and testimony. We are glad we could help add more show chrome to your Corvette, as it is cool to see the different ways you have added chrome throughout. Here at Red's, we are proud to have our chrome showcased on great looking car. We know you enjoy showing off your ride at the local car shows. Have fun at your next one. Thank you for your support and business!

Share Your Projects: Send us pictures and a short description of your project for a chance to be featured in a future Newsletter!

REDS PARTS ATTIC & CHROME PLATING: We specialize in restoring vintage and classic auto parts. Our crew has over 100+ years combined experience.
